Nuclear Engineering and Design

Contents of Volume 156

CONTENTS OF ISSUES 156(1–2)

Extended and Updated Selected Papers from Division H of the SMiRT-12 Conference

Guest Editor: F. Stangenberg

Preface, *F. Stangenberg* ix

Study on strength of thick reinforced concrete slab with opening, *T. Hirai, M. Itoh, T. Nishikawa and K. Takei* 1

Effect of small openings on strength and stiffness of shear walls in reactor buildings, *J. Kobayashi, T. Korenaga, A. Shibata, K. Akino and T. Taira* 17

A study on shear behavior of reinforced concrete beams subjected to long-term heating, *M. Maruta, M. Yamazaki and T. Miyashita* 29

Study on reactor building structure using ultrahigh strength materials, *K. Ishimura, M. Odajima, T. Uchiyama and T. Kei* 39

Fatigue strength in polymer-reinforced concrete beams under cyclic loading, *K.-H. Kwak and J.-J. Kim* 63

Ductility of high strength reinforced concrete columns, *Q. Wang, G. Zhao and L. Lin* 75

Moisture flow in concrete under steady state non-uniform temperature states: experimental observations and theoretical modelling, *G.L. England and N. Khoylou* 83

Coupled heat and mass transfer in concrete elements at elevated temperatures, *H.-P. Lien and F.H. Wittmann* 109

Structural behavior of reinforced concrete structures at high temperatures, *N. Yamazaki, M. Yamazaki, T. Mochida, A. Mutoh, T. Miyashita, M. Ueda, T. Hasegawa, K. Sugiyama, K. Hirakawa, R. Kikuchi, M. Hiramoto and K. Saito* 121

Moisture migration and drying properties of hardened cement paste and mortar, *T. Numao, H. Mihashi and K. Fukuzawa* 139

Moisture propagation and resulting stress in heated concrete walls, *P. Majumdar, A. Gupta and A. Marchertas* 147

Experimental study of air leakage from cracks in reinforced concrete walls, *K. Okamoto, S. Hayakawa and R. Kamimura* 159

Air leakage characteristics in cracked concrete, *U. Greiner and W. Ramm* 167

Leak area and leakage rate prediction for probabilistic risk assessment of concrete containments under severe core conditions, *R.A. Dameron, Y.R. Rashid and H.T. Tang* 173

Development and application of a material law for steel-fibre-reinforced concrete with regard to its use for pre-stressed concrete reactor vessels, *K. Schimmelpfennig and M. Borgerhoff* 181
Study on the influence of steel-fibre-reinforced concrete on the behaviour of anchorage for steel liners, *R. Oberpichler* 189
Hybrid fibre-reinforced concrete under repeated loading, *K. Komloš, B. Babál and T. Nürnbergerová* 195
Flexural fracture and fatigue behavior of steel-fiber-reinforced concrete structures, *D.-I. Chang and W.-K. Chai* 201
Crack growth initiation in concrete-like materials in the presence of creep, *J.R. Masuero and G.J. Creus* 209
Influence of drying and water supplying after drying on tensile strength of cement mortar, *H. Hotta and K. Takiguchi* 219
Micro-damage induced anisotropy in concrete, *L. Nobile* 229
Material equations for steel fibre reinforced concrete members, *B. Haselwander, W. Jonas and H. Riech* 235
Modeling of reinforced concrete by the non-local microplane model, *J. Ožbolt and R. Eligehausen* 249
A review of the design and construction of the Sizewell B pressurized water reactor building containment structures, *D.R. Davies, A.C. Roberts and D. Ness* 259
Dynamic and static collapse tests of reinforced-concrete columns, *C. Minowa, N. Ogawa, T. Hayashida, I. Kogoma and T. Okada* 269
Loading capacities and failure modes of various reinforced-concrete slabs subjected to high speed loading, *H. Saito, A. Imamura, M. Takeuchi, S. Okamoto, Y. Kasai, H. Tsubota and M. Yoshimura* 277
Determining aging coefficient and time-dependent losses and deformations of prestressed members with due consideration of percentage of steel, *T.K. Bandyopadhyay* 287
Strain components of nuclear-reactor-type concretes during first heat cycle, *G.A. Khoury* 313
Damage in concrete: the unilateral phenomenon, *M. Frémond and B. Nedjar* 323

Announcement 337

Instructions to Contributors 339

CONTENTS OF ISSUE 156(3)

Extended and Updated Selected Papers from Division C of the SMiRT-12 Conference

Preface, *I. Saruyama, K. Lassmann, Y.R. Rashid and J. Joseph* xi
Testing and modelling the influence of irradiation on iodine-induced stress corrosion cracking of Zircaloy-4, *I. Schuster, C. Lemaignan and J. Joseph* 343
Influence of manufacturing process on the in-reactor creep anisotropy of stress-relieved Zircaloy-2 cladding, *S.H. Shann and L.F. Van Swam* 351

Transitions in creep mechanisms and creep anisotropy in Zr–1Nb–1Sn–0.2Fe sheet, *K.L. Murty, J. Ravi and Wiratmo* 359
Mechanical behaviour modelling of fractured nuclear fuel pellets, *C. Bernaudat* 373
Analyses of pellet–cladding mechanical interaction behaviour of different ABB Atom fuel rod designs, *A.R. Massih, T. Rajala and L.O. Jernkvist* 383
A model for predicting pellet–cladding interaction-induced fuel rod failure, *L.O. Jernkvist* 393
Rupture and fragmentation of pressurized pipes and fast reactor fuel pins, *I.J. Ford* 401
